Comparison of Ottoman Production Style and Western Production Style / Osmanlı Üretim Tarzı ve Batı Üretim Tarzının Karşılaştırılması

Ersin Uğurkan¹¹Kocaeli University, Turkey

A B S T R A C T

The feudal mode of production has been examined in order to determine the nature of Ottoman-style production. By analyzing whether the Ottoman feudal mode of production, the emergence of Western feudalism were evaluated. Especially Western feudalism remained largely influenced by Roman heritage. Similarities and differences between these two systems were compared. Failure to pass an emphasis on the causes of the Ottoman system of feudalism has tried to find the answer to. In particular, What is the differences the Production of the Ottoman system from Western system and the phases of the transition process of feudalism in that process are evaluated. These assessments are examined by "labor-rent" and "surplusvalue" .
